PLEASE NOTE:
Imprints that cover entire insole will require extra screens and therefore we will charge extra fees.
This style requires a 0.3 perimeter margin of the insole, therefore full-bleed artwork will not meet the edge of the sole.

Optional Logo Sole

The logo on the outsole is a mirror image so the impression in the sand will read correctly.

Many logos require modification, depending on various details, as this process has some limitations.
- Some details may be too small to cut out and may have to be eliminated.

MAXIMUM STRAP ART AREA
